

Supporting Low Attainers to Achieve a L2 Qualification in Mathematics

Identify and meet the needs of students continuing L2 study at post-16

Who should attend?

This Work Group is for teachers whose students will study Level 2 maths across secondary and post-16. Teachers of Years 10 and 11, and of post-16 GCSE Maths resit and/or Functional Skills Maths, will develop ways to support students who need to study maths beyond age 16 to achieve a L2 qualification.

Aims of the Work Group:

- Students are better prepared for transition from KS4 to post-16 (GCSE Resit and/or Functional Skills)
- Participants will ensure that lesson design and pedagogy demonstrate a secure knowledge of curriculum continuity and sequencing.
- Secondary participants will: change their practice to address areas where there are possible barriers to progression in post-16 GCSE Resit/Functional Skills to reinforce continuity for students
- Post-16 GCSE Resit/Functional Skills participants will make use of approaches, representations and language commonly seen in secondary practice to reinforce continuity for students
