

# Growing Up in Craven

## A summary of the Growing Up in North Yorkshire survey 2018

These results are the compilation of data collected from children and young people in the vast majority of schools in North Yorkshire during Summer 2018. This survey was commissioned by the North Yorkshire Children's Trust to collect reliable information about young people's learning and well-being. This is the seventh such survey completed in North Yorkshire since 2006.

### Collecting the figures

Teachers were briefed on how to collect the most reliable data and then pupils anonymously completed the questionnaire. The sample sizes are shown in the table below.

Completed questionnaires were then returned to SHEU in Exeter for processing. Some of the schools conducted the survey online. Where figures are also given in a chart, they are shown in bold.

### Comparisons

Comparisons have been made between the figures from this district and from North Yorkshire as a whole. The North Yorkshire findings are given in brackets following the district figures, and a table summarising the most important significant findings is shown on page 14.

### Trends

This study follows similar studies in 2016, 2014, 2012, 2010, 2008 and 2006. Where changes can be seen in the figures from the district in 2016, these are noted on page 13.

This report should be read alongside the summary report for the whole North Yorkshire data set, which includes a number of important additional pieces of analysis. The **Equalities Monitoring** analysis is appended to this report.

This report is based on the responses of over 17,000 pupils

- ❑ 6% (7%) said that they have sent personal information or images to someone and afterwards wished they hadn't done or had thought more about doing so.
- ❑ 10% (10%) of pupils responded that they worry about keeping safe on the Internet, email and using mobile phones 'often' or 'all the time'.

- ❑ **61% (60%) of pupils responded that they found school lessons about keeping safe online 'quite' or 'very' useful.**

## Changes in Craven since 2016

- ❑ With a large sample and many questions, there are many significant differences to be seen. We have listed just the largest and most important of them here. For this analysis we have used only those schools which took part in the survey in 2016 and in 2018, so the figures on this page may be different to those used in the rest of the report.
- ❑ If a trend continues (or contradicts) earlier findings, this has been noted. Where trends have not been continued, there may be relief that negative developments have not continued, while positive gains have not slipped.

### Changes in Craven since 2016 - Year 2

#### MORE likely in 2018...

**\*99 Statistically significant difference.** That is, the difference compared with the whole year group is more than the usual amount of variation that we would expect in a sample of this size just by chance, suggesting that this group probably is different from the year group as a whole. Large differences will not always reach statistical significance in small samples.

**Shaded** a significant difference was previously found in 2016
