TRAINING FOR THE WRAPAROUND SECTOR

ABOUT THE TRAINING

In response to demand we've been working with and for the fast developing wraparound sector to develop several courses. We've worked with some fabulously experienced providers who have helped shape some brand new training to support the specific needs of this sector.

COURSE LENGTH AND FORMAT

Courses take 2-3 hrs in one sitting but can be completed at the learner's own pace. We actively encourage our busy workforce to try ten minutes a day.

Each course is online and enables trainees to dip in and out at their own pace. A series of films, questions and practical resources are included in the course.

Safeguarding

Covers your responsibilities in identifying and responding to concerns, creating a safe culture and understanding key legislation. Ideal for anyone working with children outside of the school day.

Inclusion

Create welcoming, accessible, and inclusive environments for all children. Explores practical strategies to support children with additional needs, reduce participation barriers and promote a sense of belonging.

Behind the Behaviour

Designed to empower all wraparound staff – whether paid or voluntary – to confidently understand and support children and young people's behaviour.

Play

Looks at the importance of high-quality play experiences for school-aged children. You'll explore practical ways to facilitate meaningful play, even in settings with limited space, time, or resources.

Business Planning for Success

Supports in building a sustainable, successful wrap-around provision. From understanding your local market and setting clear goals – you'll gain tools to plan confidently for the future.
